CROPLANDS

CropPak 12 Volt Sprayers

Croplands 12 volt sprayers are manufacture using quality componentry to ensure you receive years of trouble free operation..

On the outside, this semi transparent polyethylene tank is UV stablized, chemical resistant and has easy to read calibrated increments. On the 30, 60 & 100 litre units, the pump and filter access is recessed not only for protection from spillage but to give you space saving compactness when fitted to a ute, trailer or ATV. Tank carry handles also double as hose storage rack. On the inside there is a baffle to ensure the sprayer remains balance even when the tank is half full.

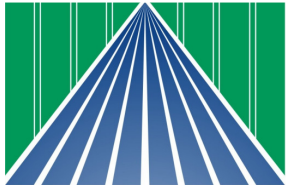

On the larger 200, 400 & the whopping 800 Litre sprayers, the pump is mounted on top away from the lid, in case you have spillage, but these units also include a baffle. Swissmex was chosen to supply the trigger, lance and adjustable nozzle as well as the lid and filling filter. In fact the lid includes clips to hold the lance when it is not in use. 6 metres of chemical resistant spray hose is also included. Flojet supply a 7.6 lpm (max) 12 volt diaphragm pump as standard which has a maximum pressure of 3.4 bar. All units are supplied with a switch and cable to connect to 12 volt power source and control the pump.

Options available are;

- *Upgrade to 15 lpm (max) pump 4 bar maximum pressure.*
- *Pressure relief valve and gauge, to ensure correct and accurate application of solution*
- *Booms from 1.5 to 6 metres*
