

## ***12 Volt Greens Sprayer***

The Croplands 50 litre Greens sprayer, shown above with the optional 4 nozzle, 1.5m boom and pressure regulating valve, is a fantastic sprayer and is perfect for tennis clubs, bowling clubs and as the name suggests golf clubs for spraying turfs which are delicate and cannot handle a sprayer with any additional weight. As the boom can be folded up for storage or to fit through a gate or door way, this unit is compact enough to provide a spot sprayer and boom spray in the one unit.

Features include the 50 litre polyethylene UV stabilized tank with large lid and filter, mounted in a steel powder coated chassis, with 2 solid plastic, rubber tyred wheel on the front and a pneumatic steering tyre at the rear, fitted with a fuse protected Flojet 12 volt pump, Arag suction filter, Swissmex trigger, lance and adjustable nozzle, 10 metres of hose and a battery.

When equipped with the 4 nozzle 1.5m boom fitted with Agrotop Polymer tip cap nozzles and pressure regulating valve and gauge to apply the most accurate amount of solution possible, this would have to be one of the easiest sprayers to use to control insects, fungus or weeds in your favourite piece of turf.
