

## Turbo TeeJet<sup>®</sup> Induction Flat Spray Tips

All in one – short construction, highly effective at reducing driftable fine droplets

### Advantages and features:

- New, patented flat spray nozzle with air induction technology for pressures of 1 to 7 bar
- Extremely good reduction of driftable fine droplets
- Optimal biological effect at medium and higher pressures
- Size of drops in all nozzle capacities is approximately the same at a given pressure resulting in a broad l/ha range while still maintaining excellent drift management properties
- For applications requiring large drops of protective plant sprays and fertilizer
- Large, round, free passage orifices for maximum free passage of fluid and air minimizing clogging and nozzle wear
- Air Induction pre-orifice may be removed if cleaning is required
- Mounting: spraying in direction of travel (black marking to the rear of the sprayer)
- Short, compact construction (Length: 22 mm) reduces risk of damage to the orifice
- Sizes 110-015 to -06

### Selection Guide
