Arag Manual Control Valves

Arag have a huge range of manual control units available, which can be mixed and matched to supply the end user exactly what is required, whether it be a simple 3 section outlet to a pressure relief valve, pressure dump, 5 section combination control unit; Arag can assist with a neat professional looking system that will last for years.

All control valve sets are bolted together to allow for easy addition or subtraction of components, each valve carries the same dimensions with the electric counterpart from Arag so upgradability is easy and inexpensive.

The standard range has a maximum flow of 250 lpm and a maximum pressure of 20 bar. Higher pressure components are available.

Components that can be mounted together include,

- Pressure Relief Valve
- Proportional Control Valve
- Combination PRV & Dump Valve
- Section Valves
- Proportional Section Valves
- Pressure Filters

Arag products are made in Italy and sold worldwide
